ABOUT THIS PROGRAM
The psychology program assists students in developing the theoretical insight and professional skills that enable them to enter graduate study and to serve in a variety of psychology-related careers and professions. The purpose of the program is to develop students equipped with psychological insight informed by a biblically-based Christian perspective. As an integral dimension of this purpose, students are introduced to a variety of training experiences in research and practice. In addition, a supervised field education or advanced research practicum experience is required for all psychology majors.
