Minor: Criminal Justice

ABOUT THIS PROGRAM
The criminal justice program provides a Christian liberal arts and social scientific basis, addressing the field of criminal justice from a biblically restorative perspective. It aims to honor biblical and social bases of law and the need for justly ordered society. Further, it recognizes that laws are not isolated from other social institutions and structures, so that the legal and social justice systems require practitioners who are well educated, resolute, just, and seasoned with Christian love. We seek to provide the criminal justice system with competent, compassionate professionals who afford not only punishment but also restoration of those who break laws and even greater restitution for the general society and victims of crimes.
