Minor: Environmental Studies

ABOUT THIS PROGRAM
The focus of the biology department is to introduce students to the structural and functional complexity of living organisms and ecological systems. It seeks to bring a Reformed Christian perspective to its science in terms of the ultimate meaning of the biological world and the nature of science. This serves as a basis for addressing ethical issues intrinsic to modern biology, relating these ideas to perspectives that students develop in Foundations courses.

MINOR COURSEWORK
- BIOL 102 Environmental Science
- BIOL 111 Survey of Plants and Animals
- BIOL 201 Ecology (MATH 151 prerequisite)
- BIOL 314 Conservation Biology
- One of the following: BIOL 252, 362, AUSB 301, 303, 304, 343, 355, 362, 452
